## machine learning

### Question Bank

1

What were some common supervised learning algorithms mentioned in the context?

2

What type of machine learning is used to find hidden patterns or intrinsic structures in the data?

3

What is one future trend in machine learning that focuses on providing transparent and interpretable results?

4

During which decade did the development of decision tree learning and the nearest neighbor algorithm contribute to the boom in machine learning research?

5

What is one of the challenges in supervised learning mentioned in the context?
